FOCUS
VENTURES LTD

*Reserves/Resources quoted are Historical (i.e. non-NI 43-101 compliant) and are derived from Cerro de Pasco Corporation reports from the early 1980's, around the time of mine closure. Focus has not completed the work necessary to have these estimates verified by a Q.P, and is not treating these estimates as current NI 43-101 defined resources; therefore the results should not be relied upon. The property will require considerable future exploration which the Company intends to carry out in due course in order to verify such estimates.

**Au Eq. based on silver:gold ratio of 66.3:1 and assumes 100% metallurgical recoveries.
